SOLID MEN ON A SOLID PLACE. Some Things That Are as l'afent as they are

Interesting. The unanimous sentiment expressed by mercial club in their visit to this city the of the grain trade of the entire state all other evening, was that Wichita was the most solidly and substantially built city of all the cities they had visited on their excursion, some forty or fifty places in all. President Patterson declared that Wichita No. 25 home, without so much as urging or even even with much less prestige than she rightfully boasts; was too great and too any other paper of equal value as an advertising of Trade uninestimately the property medium.

All transient advertisements must be paid for in proposition and urged the property advance. THE NON-PLUSHING PLUSH TANKS.

The sewer contractors hope to finish their contract by the last of this year. They have yet about 800 feet of pipe to put own, and the patentee of the finsh tanks has not yet made the tanks work satisfac tory. The trouble appears to come from the inability of the apparatus to throw out all the water in the tank at one time. The water is allowed to reach the tank very slow and not as rapidly as had been expected by the patentee, which is given an explanation of the trouble. When the water in the tanks reaches a certain please you, point the outflow only equals the inflow which is not much of a "flush." The patentee is expected to be on hand next week and claims to have some changes to make which will overcome present difficulties.

The sewer contractors claim the appara tus was adopted by the conneil and they contracted to put it in. They add that they are not under contract to make the apparatus do the work expected, but sim ply to put it in according to the plans of The trouble reported from some parts of
